Please contact our sales department for current status

The ProMop System ensures a consistently high quality standard for routine cleaning.

Service and consulting

Your KIEHL sales representative will gladly advise you on the cost-effective use of the system.

Our specialists will set up the ProMop System in your property, make sure it is fully operational, carry out the required test runs, and take care of the competent training of your staff.

In cooperation with you, we will identify the ideal product combination required for your washing and preparation process.

PRoMOP
SYSTEM

Washing

Super clean mop covers and cleaning cloths – laundered, bleached and disinfected based on your needs.

An exact dosing system ensures the proper dosing of the varying ProMop system and guarantees consistent results.

Can be used independently of specific manufacturers of cleaning textiles, machines and of washing machines.

PRoMOP
SYSTEM

Washing and preparation

Washing, disinfecting and preparation of mop covers and cleaning cloths in the washing machine

Guaranteed perfect and hygienic cleaning and disinfection of mop covers and cleaning cloths. Therefore best results for routine cleaning on all surfaces. RKI and VAH-listed ARENAS method.

Mop covers and cleaning cloths can be stored for up to 72 hours without risk of bacterial contamination (confirmed by independent experts).

PRoMOP
SYSTEM

Perfect cleanliness

Cleaning cloths - laundered, bleached, disinfected as required - for inventory cleaning.

Cleaning cloths

Thanks to the ready-to-use cleaning textiles, cleaning and disinfection products do not have to be carried along on the service trolley.

Precisely regulated process for the washing and preparation of cleaning textiles.

ProMop offers significant economic advantages for users:

- ▲ No more overdosing or underdosing of the products
- ▲ Save setup time
- ▲ No cross-contamination of dirt and germs during routine cleaning
- ▲ Decrease nosocomial infection
- ▲ Simplified workflow helps to avoid application errors
- ▲ No contact with the cleaning and disinfection solution
- ▲ Site-specific requirements can easily be integrated into the ProMop System
