

216 Rubin

High-level gloss preserver with protection formula - superconcentrate

- ▲ Preserves and maintains all vehicle surfaces particularly intensively
- ▲ Long-lasting protection against weather and environmental influences and an excellent surface gloss finish, based on a ceramic-polymer-technology
- ▲ Impregnating effect ensuring excellent water and dirt repellency
- ▲ Excellent drying results, even without the additional use of drying agents
- ▲ Full care effect even after the first wash
- ▲ No layer build-up and no smearing
- ▲ Very high foam volume that collapses quickly when used in foam devices
- ▲ Ideal for convertible soft top canvas
- ▲ Provides a pleasant and intensive fragrance experience
- ▲ Extremely economical thanks to the maximum content of active ingredient in the superconcentrate
- ▲ Free of hydrocarbons and mineral oils

Application

Product is not suitable for pre-dilution

Apply undiluted to the application with a suitable dosing device.

Wax and care:

In car washes with blower drying as a foam or spray application (8–25 ml/car).

Choose the dosage depending on the desired intensity of care and foam. When using the product as a hot wax, the temperature must not exceed 60°C.

In self-service jet washes as a spray application (1:2500–4000; 2–3 ml/min).

As to produce a delayed break-up of the water film, it is important to use a high dilution. Then rinse, ideally with osmosis water.

Note

Always keep containers closed and guide suction tubes through the closure. A change in colour and clouding may occur without any loss in quality due to the natural raw materials. Not a consumer product according to 1999/44/EC Art. 1! For professional use only! No liability is accepted in case of incorrect and unprofessional use!

Ingredients

Cationic compounds, maintenance substances, solubilizers, dyes, fragrances (Hexyl Cinnamal, Linalool, Benzylsalicylate, Geraniol).
pH value (concentrate): approx. 5
