

# 219 ECOMAX Wax

## Gloss preserver - concentrate

- ▲ Preserves and maintains all vehicle surfaces intensively
- ▲ Long-lasting protection against weather and environmental influences and an impressive surface gloss finish
- ▲ Impregnating effect ensuring good water and dirt repellency
- ▲ Good drying results, even without the additional use of drying agents
- ▲ Full care effect even after the first wash
- ▲ No layer build-up and no smearing
- ▲ Ideal for convertible soft top canvas
- ▲ Extremely environmentally aware and gentle composition
- ▲ Very economical to use thanks to the very high content of active ingredient in the high concentrate
- ▲ Free of hydrocarbons and mineral oils

**ECOMAX**

### Application

#### Product is not suitable for pre-dilution

Apply undiluted to the application with a suitable dosing device.

#### Wax and care:

In car washes with blower drying as a foam or spray application (10–20 ml/car).

Choose the dosage depending on the desired intensity of care and foam. When using the product as a hot wax, the temperature must not exceed 60°C.

In car washes with no blower drying as a foam or spray application (3–4 ml/min; 1:2000-1:2500).

Apply extensively over the vehicle. As to produce a delayed break-up of the water film, it is important to use a high dilution. Then rinse, ideally with osmosis water.

#### Note

Always keep containers closed and guide suction tubes through the closure. A change in colour and clouding may occur without any loss in quality due to the natural raw materials. Protect from frost. Not a consumer product according to 1999/44/EC Art. 1! For professional use only! No liability is accepted in case of incorrect and unprofessional use!

#### Ingredients

Cationic compounds, maintenance substances, water-soluble solvents, solubilizers, dyes, fragrances.  
pH value (concentrate): approx. 6
