

709 Gomma-Shine

Rubber and tyre maintenance for manual application

- ▲ Offers outstanding depth of colour and a high-gloss finish on tyres and plastic components
- ▲ Very effective on already damp tyres
- ▲ Highly dirt- and water-repellent on tyres, plastics and rims
- ▲ Very economical thanks to maximised product concentration

Application

Do not spray on functioning parts (e.g. brake discs).

Product is not water-miscible

Apply undiluted to the application with a suitable dosing device or use manually.

Wax and care:

as a care for tyres and plastic (5 ml/tire).

Apply the undiluted product with a brush, sponge or cloth. Can also be used on tyres that are already damp. Do not overdose, as excess product can reach unwanted surfaces while driving.

Note

Always keep containers closed and guide suction tubes through the closure. The plant manufacturer's instructions must be adhered to. Not a consumer product according to 1999/44/EC Art. 1! For professional use only! No liability is accepted in case of incorrect and unprofessional use!

Ingredients

Maintenance substances, water-insoluble solvents, fragrances.
