

Opytec

Heavy-duty hand cleaner

- ▲ High-quality, dirt-dissolving, viscous hand-washing soap to remove oily, greasy and encrusted dirt
- ▲ Intensive and gentle cleaning thanks to special washing substances and skin-friendly scrubbing agents
- ▲ Protects and cares for the skin thanks to its replenishing, protective skin care components
- ▲ Preserves the skin's natural protective acidic mantle
- ▲ Dermatologically safe
- ▲ Extremely economical
- ▲ Does not block drains and gullies, unlike conventional sand-based pastes
- ▲ Contains renewable plant-based raw materials

Area of application

For the washing of hands soiled heavily with oily, greasy or encrusted dirt, e.g. in workshops, food-processing companies, paintshops, industrial and production companies.

Application

Shake product if it has not been used for a while!

Dispenser and packagings:

When using the PE soft bottle, pull the plastic cap from the dosage unit, do not unscrew. Place the canister in the ManoDos-soft dispenser with the dosage unit at the bottom, push back and close the dispenser. When first operating the dispensing lever, the dosage unit audibly clicks into place and is then ready for use. Each environmentally friendly PE soft bottle is supplied with a new dosage unit. Thus, there is no need to clean and service the dosage unit. When using refillable dispensers and dispensers suitable for viscous products, fill the container with the product. Avoid mixing with other products. Fully empty the dispenser at least twice a year and rinse thoroughly with warm water. When using the screw-on dosing pump, screw onto the canister, operate the pump twice (approx. 2 ml) and wash the hands as described. Thoroughly clean the inside and outside of the dosing pump with warm water prior to changing the canister.

Hand washing:

Dispense 2 ml of the product onto dry hands and rub in. Lightly moisten and continue rubbing. Then rinse under running water and dry carefully. Consumption: 2.0 ml/application.

For detailed, printable hand washing instructions, please visit www.kiehl-group.com. We recommend products from the "marina KC" range to protect hands during and after work.

Note

Suitable for use in wall dispensers with an ambient temperature of 5–35 °C. The packagings are recyclable sorted by type.

Ingredients

INCI (Aqua, Zea Mays Cob Meal, Sodium Laureth Sulfate, Cocamidopropyl Betaine, Bentonite, PEG-7-Glyceryl Cocoate, Glycerin, Sulfated Castor Oil, Phenoxyethanol, Citric Acid, Sodium Benzoate, Limonene, Salicylic Acid, CI 42051, Sorbic Acid).
pH value (concentrate): approx. 5
