

# Opysafe

## Universal skin protection lotion

- ▲ High-quality viscous skin-protection lotion
- ▲ Protects against oily, greasy and aqueous dirt
- ▲ Skin-friendly hand protection without leaving an annoying greasy film
- ▲ Makes handwashing easy
- ▲ Suitable for all areas of application
- ▲ Preserves the skin's natural protective acidic mantle
- ▲ The moisturising skin protection components protect against skin irritation
- ▲ Dermatologically tested and extremely economical
- ▲ Free of silicones
- ▲ Contains renewable plant-based raw materials

### Area of application

For the gentle protection of the hands and adjacent areas of skin. Protects the hands against oily and greasy soiling and against aqueous solutions. Ideal for use in all areas requiring comprehensive skin protection, e.g. in retirement homes, hospitals, food-processing companies, kitchens, schools, nurseries, workshops etc.

### Application

The hands must be thoroughly cleaned and dried prior to using the cream.

### Dispenser and packagings:

When using the PE soft bottle, pull the plastic cap from the dosage unit, do not unscrew. Place the canister in the ManoDos-soft dispenser with the dosage unit at the bottom, push back and close the dispenser. When first operating the dispensing lever, the dosage unit audibly clicks into place and is then ready for use. Each environmentally friendly PE soft bottle is supplied with a new dosage unit. Thus, there is no need to clean and service the dosage unit. Avoid mixing with other products.

### Hand protection:

Hands must be thoroughly cleaned and dried prior to applying the protective lotion. Place 0.3–0.8 ml of the product in the hands and rub in thoroughly. Pay special attention to the nail bed, the area under the nails and between the fingers; apply cream to other stressed areas of skin too. In order to guarantee sufficient protection, hands must be fully covered in cream before work and after each break. Before beginning work, apply a sufficient amount of protective lotion. Consumption: 0.3–0.8 ml/application.

For detailed, printable instructions for using the cream/lotion, please visit [www.kiehl-group.com](http://www.kiehl-group.com). We recommend products from the “marina KC range” for cleaning hands.

### Note

Suitable for use in wall dispensers with an ambient temperature of 5–35 °C. The packagings are recyclable sorted by type. Protect from frost.

### Ingredients

INCI (Aqua, Glyceryl Stearate Se, Cetearyl Ethylhexanoate, Glycerin, Cetearyl Isononanoate, Talc, Kaolin, Polyvinyl Alcohol, Cetearyl Alcohol, Panthenol, Hydroxyethylcellulose, Hamamelis Virginiana Water, Tocopheryl Acetate, Stearic Acid, Sodium Lauryl Sulfate, Sodium Cetearyl Sulfate, Gallic Acid, Phenoxyethanol, Methylparaben, Ethylparaben, Parfum).  
pH value (concentrate): approx. 5.5
